Profile

Backend-focused Software Engineer with 2.5 years of experience (including internship) designing and building distributed systems and internal R&D tools using Java (Spring Boot). Proven track record of delivering high-performance authorization frameworks and schema inference utilities, collaborating across teams to translate complex technical requirements into maintainable code. Actively evolving into a Full-Stack role with React, with a strong focus on code quality, platform reliability, and developer experience in R&D environments.

Technical Skills

Languages: Java, SQL, JavaScript, HTML/CSS
Frameworks & Libraries: Spring Boot, Spring Security, Hibernate, React, JUnit, Mockito
Data & Messaging: PostgreSQL, MySQL, Kafka (Basics)
Cloud & DevOps: Docker, Jenkins, Git, Bitbucket, Maven Plugin Development
Specialized Tools: Open Policy Agent (OPA), OPAL (Policy Distribution)
Core Concepts: Distributed Systems, Microservices Architecture, API Design, System Design, Test Driven Development (TDD), CI/CD Pipelines

Experience

Associate Engineer (R&D) | Litmus7 Systems Consulting *July 2024 – Present*

- **Developing a decoupled authorization engine** for a low-code data engineering platform using **Spring Boot** and **Open Policy Agent (OPA)**; implemented Fine-Grained Access Control (FGAC) to secure data processing and reporting workflows.
- **Integrated OPAL (Open Policy Administration Layer)** for real-time policy distribution, ensuring low-latency synchronization of security rules across distributed microservices.
- **Built a Schema Inference Utility** to automate metadata discovery and mapping for SQL and NoSQL data stores, reducing manual configuration for the platform's analytics integration.
- **Engineered custom Maven Plugins** to automate build-time quality gates and enforce architectural standards, streamlining the CI/CD process for the R&D team.
- **Technical Mentor & Interviewer:** Guided two junior developers on Java concurrency and RESTful design; conducted technical interviews for freshers to evaluate core CS fundamentals and Spring Boot proficiency.

Project Intern | Suntec Business Solutions *Jan 2024 – June 2024*

- Optimized REST API modules for the Xelerate platform using **Spring Boot** and **Hibernate**.
- Developed automated test suites using **JUnit** and **Mockito**, reducing bug leakage in product catalog components.

Projects

Decoupled Authorization Engine *Litmus7 R&D*

- Implemented a sidecar pattern to enforce **Fine-Grained Access Control** across microservices without modifying service source code.
- Used **OPAL** to handle real-time policy distribution, ensuring all service instances stay synchronized with the latest security rules.

Malayalam Advice Generator | github.com/me-krishnaprasad-dev/advice-gen *Personal Project*

- Developed a full-stack application integrating the **Gemini API** for high-fidelity English-to-Malayalam translations.
- Designed a responsive front-end that interacts with a Spring Boot backend to deliver localized content via REST.

Problem Solving & Education

LeetCode: Solved **250+** problems (Java); focused on Data Structures and Logic.

Education: B.Tech in CSE, Rajiv Gandhi Institute of Technology (2024) — **CGPA: 8.27**

Recognitions & Activities

- **Credibility Award (Litmus7):** Awarded for technical excellence and high delivery ownership in the development of R&D platform modules.
